Career Summary

Computer Science Engineering student with a CGPA of 8.73 and hands-on experience through three internships in Full Stack and Java Full Stack Development. Skilled in Java, Spring Boot, REST APIs, MySQL, JavaScript, HTML, and CSS with a strong foundation in Data Structures and Object-Oriented Programming. Passionate about building scalable software solutions and continuously learning modern technologies.

Education

Bachelor of Computer Science and Engineering **Sept 2023 – Aug 2027**
PSNA College of Engineering and Technology | CGPA: 8.73 | Full-time

HSC – Class XII **June 2022 – Mar 2023**
St.Joseph's Girls Higher Secondary School | Percentage : 91% | Full-time

SSLC – Class X – State Board **June 2020 – Mar 2021**
St.Joseph's Girls Higher Secondary School | Percentage : Pass (COVID-19 Batch) | Full-time

Internships

Full Stack Web Development Intern – Reccsar Pvt. Ltd. **June 2026 – July 2026**
- Successfully completed internship training in Full Stack Web Development.
- Worked on frontend, backend, and database concepts while following software development best practices.
- Strengthened debugging, testing, and problem-solving skills through practical assignments.

Java Full Stack Intern – Pantech E-Learning **June 2025 – July 2025**
- Developed backend applications using Spring Boot and MySQL.
- Designed REST APIs using layered architecture principles.
- Applied object-oriented programming concepts to build modular and maintainable applications.

Full Stack Developer Intern – CodeAlpha **Jan 2025 – Feb 2025**
- Built responsive web applications using HTML, CSS, JavaScript, and Java.
- Worked on frontend-backend integration, debugging, and testing.

Projects

Course Registration System – Using Spring Boot and MySQL [GitHub]
- Designed and implemented REST APIs for student registration and course enrollment.
- Applied layered architecture (Controller–Service–Repository) to improve scalability and maintainability.

Student Management System – Using Java, JDBC and MySQL [GitHub]
- Developed a CRUD-based backend application for managing student records.
- Integrated JDBC with MySQL and implemented validation to ensure data consistency.

EduPath AI – Using React and MongoDB [GitHub]
- Developed an AI-assisted education planning platform to generate personalized learning recommendations.
- Designed responsive user interfaces and integrated backend data management.

Java Quiz Application – Using Core Java [GitHub]
- Developed a console-based quiz application using Core Java and object-oriented programming principles.
- Implemented question management, score calculation, and result evaluation with a modular program structure.
- Applied exception handling and clean coding practices to improve application reliability and maintainability.

Skills

Languages : Java, JavaScript, SQL | Database : MySQL
Core Concepts : Data Structures & Algorithms, Object Oriented Programming, DBMS
Web Technologies : Front-End : HTML, CSS, JavaScript | Back-End : Spring Boot, REST APIs, JDBC
Tools : Git, GitHub, IntelliJ IDEA, Eclipse
Additional : Docker (Basics), Operating Systems, Computer Networks

Certifications

- NPTEL: Programming in Java (62/100), Data Structures using Java (58/100), Foundation of Cloud IoT Edge ML (75/100)
- Docker for Java Developers (Udemy) | Crash Course in Python (Coursera) | HDCA

Conference Experience

- Presented the Smart Canteen Project at a conference.

Hackathon Experience

- Participated in Tensor 24-Hour Hackathon (SRM Trichy), 12-Hour Hackathon (Prince Institutions) and IBM TGMC.

Achievements & Participation

- Solved 150+ LeetCode problems | HackerRank 3-star in Java | 1st Prize – Logic Fest | Prompt Paradox and IoT, AI & Cloud workshops
